PROFILE

Computer Science & Engineering student and **backend developer** focused on building clean, scalable and user-friendly applications. I learn by shipping real projects: a live e-commerce platform, a full-stack MERN app, a Java + MySQL banking system and an IoT plant-watering system with its own mobile app.

PROJECTS

Uparzo - E-Commerce Platform

LIVE

[Live | Web, E-Commerce](#)

A live e-commerce platform for managing online stores, products and orders (uparzo.com).

AI-Powered Learning Assistant App

IN DEVELOPMENT

[Full-Stack MERN App | React, Node.js, MongoDB](#)

Current semester project building an AI-powered learning assistant with the MERN stack.

ATM & Bank Management System

COMPLETED

[Java, MySQL](#)

Banking management system implementing accounts and core ATM operations on a MySQL database.

Smart Plant Monitoring & Watering System

COMPLETED

[IoT, Arduino, Sensors, Custom Mobile App](#)

Automated system with real-time plant monitoring and automatic watering, plus a custom mobile app for remote control.

Groundwater Depletion Prediction

ONGOING

[Machine Learning Research | Python, CNN, LSTM](#)

Research on predicting groundwater depletion in rural areas. CNN and LSTM models are showing reasonably promising performance.

TRAINING

Backend Development Course

ONGOING

[Programming Hero](#)

Building modern frontend and backend skills with a particular focus on backend development.

Software Development Course

ONGOING

[Phitron](#)

Software engineering foundations through structured programming and development training.

EDUCATION

B.Sc. in Computer Science & Engineering

[Metropolitan University](#)

2024 - Present | CGPA 3.76

Higher Secondary Certificate

[BAF Shaheen College](#)

[Shamshernagar](#)

2022 | GPA 5.00

Secondary School Certificate

[BAF Shaheen College](#)

[Shamshernagar](#)

2020 | GPA 5.00

SKILLS

Backend

Node.js, Java, Python, MySQL, MongoDB

Languages

Java, Python, C, C++, JavaScript

Frontend

React, HTML, CSS, Tailwind CSS

Tools

Git & GitHub

Other

Problem solving, IoT / Arduino, Machine Learning (CNN, LSTM)

FOCUS

Backend development and building complete apps, from database and server logic to the interface people use.
